“ Ecobuild is an important show for BALI. It provides the perfect platform to promote the association's membership benefits and enquiry process directly with landscape architects, contractors, garden designers and specifiers. It's encouraging to see the landscaping industry establishing stronger links with the building and construction sectors, from green roofs to urban street furniture. We are looking forward to working collaboratively with Futurebuild Events to provide our members and the wider landscape industry with better opportunities to promote their products and services with a dedicated landscaping zone in 2018.” **”**

Darren Taylor, Marketing and Communications Manager,
British Association of Landscape Industries
