Bringing offsite construction to life

Returning for its second year, the Offsite district in partnership with Explore Offsite, will bring you a ground-breaking exhibition of offsite construction solutions and masterclasses, the largest of its kind ever seen in the UK!

Forward-thinking companies and major players from around the globe are making the most of the opportunities provided by offsite construction and are relishing the chance to demonstrate their technology.

The use of offsite technology is the most significant development in the construction sector for many years. The Offsite district will focus on key industry innovations and provide a comprehensive and balanced perspective on this rapidly emerging supply-chain sector.

25,400
overall visitors

3,000+
visitors attend specifically
for offsite technologies

1,039
seminar attendees

The biggest & most dynamic offsite event yet!

The UK offsite construction market is expanding rapidly, at more than 35% per annum, and for some sectors offsite technology has become commonplace. However, with an estimated share of just 10% of the construction market, the opportunity for offsite remains phenomenal.

Visitors will gain a comprehensive and balanced perspective on this rapidly evolving sector. They will experience a wide range of offsite technology from a host of UK and international suppliers, and view for themselves the major advances in offsite manufacturing.

Explore Offsite Technology Masterclasses

Learn about the latest in offsite technology developments with expert information and seminars on solving the housing shortage, using offsite technology to construct a more sustainable environment, and how the industry is responding to unprecedented demand through greater investment in lean manufacturing systems.

Free CPD accredited Explore Offsite Technology Masterclasses will run daily throughout the show to offer an independent perspective of the offsite construction sector. Intensive training masterclasses will address the drivers and benefits of using offsite construction technology and provide visitors with the knowledge to successfully apply these techniques.

Meet senior, forward thinking professionals with purchasing power:

88% of visitors managerial level or above

72% of visitors authorise or specify products

“It’s one of the few events that really brings everybody together, the combination of different exhibition stands, together with the talks that people are giving, sharing knowledge and information across the industry leads to a far more collaborative approach for the industry”

Steve Newell, General Manager, Portakabin

Showcasing:

Framing systems in concrete, timber and steel

Modular and volumetric systems

Bathroom and kitchen pods

Offsite roofing technology

Pre-engineered building services

Offsite technologies and a range of prefabricated building components

“Increasingly, the construction industry is turning its attention to the substantial benefits offsite technology can offer. In order to make the most of what is possible, clients, contractors and industry at large must have up-to-date knowledge of what offsite technology suppliers can offer.”

Darren Richards, Managing Director, Cogent Consulting

Confirmed exhibitors for 2018 include:

District includes:

- New larger Explore Offsite Seminar Theatre*
- Free Explore Offsite Technology Masterclasses
- Ask the Expert sessions
- Hosted Buyers Programme for Offsite Technologies*
- Offsite Awards and networking event*
- Feature builds for 2018* **new for 2018*
